

Wesley Vieira

SOFTWARE ENGINEERING LEADER

Software. People. Applied AI.

Software engineering leader combining hands-on architecture, people development and cross-team delivery in regulated financial services. Leads 2 squads and 15+ engineers across 20+ systems/services. Connects Java/JVM, AWS, distributed systems, data, AI, product and security with reliable production delivery. Career initiatives include R\$800M+ in reported revenue and fraud-loss mitigation outcomes.

From fraud prevention and product strategy to leading critical banking engineering.

Osasco / São Paulo, Brazil

CAREER & SELECTED WORK / OCTOBER 2026

READING GUIDE

A career built across disciplines.

Leadership first. Technical depth next. Evidence and the complete learning record follow.

01

Leadership & career
Accountability, delivery scope and the journey through financial services.

02

Engineering expertise
Architecture, software, cloud, data, security and applied AI.

03

Recognition & contribution
Award-winning work, media coverage, recommendations and volunteering.

04

Technical writing
13 original articles, with covers, summaries, topics and direct links.

05

Education & languages
A daily study system, 27 programs, professional credentials and languages.

06

Complete learning record
448 course records from 398 license entries and 50 course entries.

6h daily study commitment / 7+ years of consistent learning

Leading critical engineering.

Itaú Unibanco / Jun 2026 - Present / Fraud Prevention / São Paulo, Brazil

Lead Software Engineer

2

engineering squads

15+

engineers

20+

systems and services

- Own technical direction for 2 squads and 15+ engineers across 20+ fraud engines, systems and services supporting Pix, debit and credit cards, vehicle and mortgage credit, and crypto journeys.
- Drive hands-on modernization of a ~1,900-file legacy landscape into maintainable AWS services and repositories, using Java, Spring Boot, Kotlin, Python, REST APIs, Kafka, Redis and IBM MQ.
- Define architecture and engineering standards across distributed systems, Terraform, Kubernetes, Docker, CI/CD, DevSecOps, automated testing, observability and SRE; guide design reviews and production reliability.
- Shape technical roadmaps across Engineering, Product, Architecture, Data, Security, Risk and Business; build AI agents and engineering automation with RAG, MCP, LangGraph, Claude Code, Devin and GitHub Copilot.

ENGINEERING CONTEXT

Bank-wide fraud decisioning spans Pix, debit and credit cards, vehicle and mortgage credit, and cryptocurrency journeys. Modernization connects cloud architecture, legacy decomposition, engineering governance and production reliability.

~1,900

legacy files in the modernization landscape, evolving into maintainable AWS services and repositories.

01 / EXPERIENCE

Building credit at banking scale.

Financial services since 2019: software engineering, product strategy and technical leadership.

Bradesco

Feb 2025 - May 2026

Lead Software Engineer

Credit Platforms & Digital Channels | Osasco, Brazil

- Led architecture and launch of an investment-backed personal-credit platform associated with R\$150M+ in new revenue, directing 3 cross-functional squads and integrating Java microservices, Kafka, HBase, Python and FICO eligibility rules.
- Led secured-lending initiatives covering CCB issuance, collateral locks, credit and investment rules, and alphanumeric CNPJ modernization across hybrid cloud and mainframe systems.
- Designed and evolved enterprise credit services with Saga and circuit-breaker patterns; modernized COBOL, JCL and DB2 integrations alongside Java services and Azure environments.
- Led backend, BFF and mobile delivery across TypeScript, Kotlin, Swift, Java, REST APIs and Redis; strengthened CI/CD, DevSecOps, observability and production stability, and contributed to the Bitbucket-to-GitHub migration.
- Mentored junior through senior engineers through design reviews, solution assessments, pull-request reviews, feedback and career development; aligned Product, Security, Architecture, Infrastructure, Operations and Business.

THE LEADERSHIP RESPONSIBILITY

Architecture and technical judgment. Delivery alignment. Production stability. Mentoring and career development. Decisions made with Product, Security, Infrastructure, Operations and Business.

01 / EXPERIENCE

From product strategy to software.

Financial services since 2019: software engineering, product strategy and technical leadership.

Itaú Unibanco

Oct 2024 - Jan 2025

Senior Java Software Engineer

Personal Credit | São Paulo, Brazil

- Engineered backend services and integrations for vehicle, consortium and mortgage credit using Java, Spring Boot, Spring MVC, Spring Data, Hibernate/JPA, JDBC and SQL.
- Connected FICO Credit Engine business rules with Python/PySpark analysis and systems of record / sources of truth (SoR/SoT); translated credit requirements into secure, traceable APIs and maintainable workflows.
- Supported architecture evolution, production incidents, automated testing, CI/CD and observability with a focus on reliability, performance, authentication and authorization.

Itaú Unibanco

Nov 2023 - Oct 2024

Senior Technical Product Manager

- Led squads across product, engineering, data, cybersecurity and risk; owned discovery, roadmaps, backlog priorities, stakeholder alignment and delivery of customer-protection solutions.
- Turned ambiguous fraud scenarios into APIs, integrations, data flows, security requirements and measurable initiatives; built engineering capability across backend and frontend while balancing risk, customer experience and operational efficiency.

01 / EXPERIENCE

The foundations of the journey.

Financial services since 2019: software engineering, product strategy and technical leadership.

Itaú Unibanco

May 2022 - Nov 2023

Product Manager

- Evolved fraud-prevention products, internal tools and digital journeys through business analysis, process mapping, data interpretation, requirements, prioritization, solution validation and outcome monitoring.
- Connected Engineering, Analytics, Operations, Security and Business on fraud rules, customer journeys, integrations and risk-based product improvements.

Itaú Unibanco

Dec 2020 - May 2022

Fraud Prevention Junior Analyst

- Delivered R\$300M in reported fraud-loss savings through an automated AWS SageMaker machine-learning pipeline integrated with legacy TCP/IP systems.
- Led the WhatsApp fraud-alert initiative later recognized with the Walther Moreira Salles award; analyzed suspicious behavior, indicators, controls and operational processes to improve customer protection.

Itaú Unibanco

Sep 2019 - Nov 2020

Corporate Security Intern

- Supported security, operational controls, risk awareness, governance, documentation and internal procedures, building a foundation in banking risk and business continuity.

BMP Money Plus

Feb 2019 - Aug 2019

Investments Intern

- Supported FIDC investment structures, personal-credit operations, documentation and commercial processes, with responsibility for operations on a R\$100M+ portfolio.

Career progression: investment operations, security and fraud analytics, followed by product leadership, software engineering and technical leadership.

Architecture, languages & delivery.

Technical breadth grounded in regulated financial systems and hands-on engineering.

01 Product, leadership & communication

Technical strategy, architecture roadmaps, design/code reviews, mentoring, discovery, prioritization, product metrics, Scrum, Kanban, ITIL, data storytelling, GitHub Pages and Docusaurus; Excel, Power BI, Access, Office, macros/VBA and Adobe Premiere Pro.

02 Architecture & integration

Microservices, distributed systems, event-driven architecture, BFF, Saga, Circuit Breaker, GoF design patterns, Lambda/Kappa architectures, SoR/SoT integration, FICO Credit Engine, mainframe modernization and hybrid cloud.

03 Languages & programming

Java, Kotlin, Python, TypeScript, JavaScript, SQL; Go, Swift, C#, .NET, COBOL, JCL. Additional profile breadth: C, PHP, VBA, LINQ, object-oriented and functional programming, Streams, lambdas and reflection.

04 Backend & APIs

Spring Boot, Spring MVC, Spring Data, Spring Security, Hibernate, JPA, JDBC, DAO, Lombok, Java Servlet, Maven, Node.js, Express.js, Django, Django REST Framework; REST, OpenAPI/Swagger, GraphQL and gRPC.

Professional delivery, profile-listed knowledge and continuing education underpin this technical range, with core applied depth in Java/JVM, AWS and distributed financial systems.

02 / ENGINEERING EXPERTISE

Cloud, reliability & security.

Technical breadth grounded in regulated financial systems and hands-on engineering.

05 Cloud infrastructure & delivery

AWS, Microsoft Azure, Terraform, Docker, Kubernetes, Linux, virtualization and CI/CD. Further applied study: Google Cloud, GKE, Ansible, Helm, Istio, ArgoCD, Azure Red Hat OpenShift and Amazon Lightsail.

06 DevSecOps, SRE & quality

Git, GitHub, GitFlow, Bitbucket, Jenkins, SonarQube, Fortify, Veracode, OWASP, JWT, LDAP, authentication and authorization; Datadog, Prometheus, Grafana, Splunk, ELK, SLOs, incident management, JUnit, Cucumber BDD, TDD, Jasmine and Karma.

07 AWS compute, network & security

EC2, ECS/Fargate, EKS, Lambda, Elastic Beanstalk, S3, VPC, EBS, ELB, Route 53, CloudFront, IAM, WAF, Shield, Cognito, Macie, AWS CLI, CloudFormation, CodeBuild, CodePipeline and CloudWatch.

08 AWS data & orchestration

RDS, Aurora, DynamoDB/DAX, Redshift, Glue, Athena, EMR, Kinesis, MSK, SageMaker, SQS, SNS, Step Functions and EventBridge.

Professional delivery, profile-listed knowledge and continuing education underpin this technical range, with core applied depth in Java/JVM, AWS and distributed financial systems.

Data, intelligence & experience.

Technical breadth grounded in regulated financial systems and hands-on engineering.

09 Data platforms & messaging

PostgreSQL, MySQL, SQL Server, DB2, HBase, Redis, Kafka, IBM MQ, Hadoop, ZooKeeper, PySpark, Pandas and SAS; MongoDB, NoSQL, SQLite, Spark, Airflow, Databricks, Data Mesh, ETL and data warehousing.

10 AI, machine learning & agents

Generative AI, LLMs, AI agents, RAG, MCP, LangGraph, Claude Code, Devin, GitHub Copilot, TensorFlow, Keras, scikit-learn, NLP, MLOps, Jupyter, Matplotlib and Seaborn; PyTorch, neural networks and model evaluation.

11 Frontend, mobile & design

React, Next.js, Vue, Nuxt, Angular, Angular Material, RxJS, Electron, Ember, jQuery, Bootstrap, HTML/HTML5, CSS, AJAX, Web Components, Webpack and Gulp; Flutter; Kotlin/Android, Swift/iOS, Figma and Draw.io.

Professional delivery, profile-listed knowledge and continuing education underpin this technical range, with core applied depth in Java/JVM, AWS and distributed financial systems.

03 / RECOGNITION

Engineering with visible consequences.

Walther Moreira Salles Award / Itaú Unibanco / December 2023

Receiving the 21st Walther Moreira Salles Award with the project team.

Interview during the WMS award ceremony.

At the WMS recognition event.

21st Walther Moreira Salles Award | Itaú Unibanco | Dec 2023. Winning fraud-alert project associated with R\$350M in fraud-loss mitigation. 3rd place, Itaú Data Battle 2021.

Volunteer security speaker, Expo Longevidade 2022: helped older adults recognize social engineering, phishing, financial scams and identity theft, translating technical risks into practical guidance.

R\$350M

Reported fraud-loss mitigation in the first year of the WhatsApp alert initiative.

Recognition for the WhatsApp fraud-alert initiative, connecting fraud intelligence and timely customer communication. The project is associated with R\$350M in reported fraud-loss mitigation.

Business impact. Public evidence.

Five publications covered the bank’s use of WhatsApp to alert customers to suspicious card transactions. These articles document the launch of the initiative later recognized by the WMS award.

R\$350M

Customer protection

WhatsApp fraud alerts and immediate customer validation.

R\$300M

Fraud-loss savings

ML automation and an AWS SageMaker pipeline integrated with legacy TCP/IP systems.

R\$150M+

New credit revenue

Investment-backed personal-credit platform and digital credit delivery.

03 / RECOMMENDATIONS

What colleagues say.

Original recommendations, preserved in Portuguese.

Wesley é um profissional ímpar com sólidos conhecimentos em tecnologia aplicada a formas de promover a experiência do cliente mais segura, incluindo motores e suas implementações, até ferramentas diversas da operação. Tenho contato com seu apoio em demandas relacionadas a soluções para as unidades internacionais do itaú, e sua atuação tem sido fundamental para trazer uma visão técnica, estruturada e estratégica para temas de elevada complexidade. Destaco também sua capacidade de entender os desafios do negócio, propor soluções de forma objetiva e atuar de maneira colaborativa com diferentes times e stakeholders. É um profissional com atitude de dono e extremamente colaborativo.

Tive a oportunidade de trabalhar com o Wesley e posso afirmar que é um profissional de excelência. Como Analista e Tech Lead Sênior, demonstra profundo conhecimento técnico, grande capacidade analítica e habilidade para transformar requisitos complexos em soluções eficientes e sustentáveis. Sua postura proativa, de bom relacionamento, comprometimento com a qualidade e foco em resultados fazem a diferença. Obrigada pelo tempo que tivemos juntos no projeto. Te admiro muito. Parabéns pelo excelente trabalho realizado!!!

Ana Luísa Khouri

Tech Product Manager | Fraud Prevention (LatAm)
| 24 Aug 2026

Luciene Chagas de Oliveira, Ph.D.

Senior Tech Lead / Software Engineer, Bradesco | 5 Jun 2026

03 / RECOMMENDATIONS

What colleagues say.

Original recommendations, preserved in Portuguese.

Trabalhamos juntos em um projeto bastante importante para organização, o Wes mesmo como Júnior demonstrava boa capacidade de articulação e organização em frente as múltiplas demandas e desafios do projeto!

Steffani Arruda

Senior Product Manager | 29 Jul 2024

Super recomendo, trabalhamos juntos na Money Plus e sempre se mostrou um ótimo profissional, pró ativo.

Carmen Locatelli

Structured Operations Analyst | 3 Jul 2020

Funcionário extremamente competente!

Heitor Augusto

Executive Director | Financial Infrastructure, BaaS & Credit | 1 Nov 2019

03 / COMMUNITY CONTRIBUTION

Making security understandable.

Volunteer security speaker / Expo Longevidade 2022 / Banco Itaú / October 2022

Technology serves people.

Volunteered at Expo Longevidade 2022, educating senior citizens about digital security, fraud prevention and online safety. Translated complex cybersecurity risks into practical guidance on social engineering, financial scams, phishing and identity theft, helping participants protect their personal information and use digital services with greater confidence.

The same thread runs through the career: understand risk, translate complexity and turn technology into practical protection.

Focus areas

Digital safety

Fraud prevention

Social engineering

Phishing & identity theft

Customer education

Writing as engineering contribution.

Technical author of 13 published articles on AI, Java, data and distributed systems, translating complex engineering into clear, practical learning.

01 AI engineering & agents

Author of 13 technical articles connecting AI, software architecture, Java, data, cloud and security. Combines original analogies, annotated code and practical walkthroughs to make complex ideas accessible. This public body of work demonstrates technical breadth, clear communication and the ability to share engineering knowledge beyond the immediate team.

02 Models, language & data

From numerical representations to storage decisions, these articles develop intuition before introducing implementation details. The writing connects foundational concepts with practical engineering choices.

03 Architecture & execution

A recurring thread in the writing is the link between an architectural idea and how software actually runs. Concrete examples connect legacy integration, Java execution and container orchestration.

04 Networks & security

Clear explanations of network behavior and security boundaries support better engineering discussions across software, infrastructure and security teams.

05 Delivery & observability

These articles connect delivery decisions with the evidence needed to operate software. Practical examples make rollout strategy, instrumentation and troubleshooting easier to communicate.

04 / ORIGINAL TECHNICAL WRITING

Ideas made accessible.

Technical author of 13 published articles on AI, Java, data and distributed systems, translating complex engineering into clear, practical learning.

01 / LINKEDIN / 15 SEP 2026

LangChain + LangGraph para entender o DNA: quando o código da vida encontra agentes de IA

Builds a Python and LangGraph workflow that validates DNA, calculates sequence metrics and uses an LLM to explain the results. Connects deterministic computation, state and conditional routing through a practical example, with a linked GitHub implementation.

LangGraph • LangChain • Python • AI agents

The discipline behind the depth.

A six-hour daily commitment, supported by a recurring seven-day learning calendar.

6h

DAILY STUDY COMMITMENT

7 days

A place for learning every day.

7+ years

Of consistent study and continued development.

I turn curiosity into a structured daily practice. My calendar reserves focused time for engineering, leadership, mathematics, academic programs, certifications and languages, with review built into the week.

01 **Engineering**

Software, cloud, security, data and AI.

9h / week

03 **Academic programs**

Time reserved for academic coursework.

4h15 / week

05 **Certifications**

Structured professional credential study.

3h15 / week

02 **Languages & review**

Daily English, rotating languages and consolidation.

24h30 / week

04 **Math & algorithms**

Foundations, theory and problem solving.

3h30 / week

06 **Leadership**

Learning about people, decisions and influence.

2h / week

PLANNED, PROTECTED, REPEATED.

The current calendar reserves 6h15 to 7h per day, with 46h30 across the week. Time blocks give each learning priority a clear place and keep review part of the routine.

How I organize the week.

Current recurring plan from 12 Oct 2026. São Paulo time (UTC-3). Planned blocks, not an attendance log.

Monday 6h45 planned 01:30 Leadership 15m 01:45 Mathematics 15m 02:00 Certifications 30m 02:30 Academic programs 30m 03:00 Technical study 90m 04:30 Algorithms 15m 04:45 English 30m 05:15 Spanish 30m 05:45 Dutch 30m 06:15 French 30m 06:45 German 30m 07:15 Italian 30m 07:45 Language review 30m	Tuesday 6h45 planned 01:30 Leadership 15m 01:45 Mathematics 15m 02:00 Certifications 30m 02:30 Academic programs 30m 03:00 Technical study 90m 04:30 Algorithms 15m 04:45 English 30m 05:15 Mandarin 30m 05:45 Hindi 30m 06:15 Japanese 30m 06:45 Korean 30m 07:15 Greek 30m 07:45 Language review 30m	Wednesday 6h15 planned 01:30 Leadership 15m 01:45 Mathematics 15m 02:00 Certifications 30m 02:30 Academic programs 30m 03:00 Technical study 60m 04:00 Algorithms 15m 04:15 English 30m 04:45 Spanish 30m 05:15 Dutch 30m 05:45 French 30m 06:15 German 30m 06:45 Italian 30m 07:15 Language review 30m	Thursday 6h15 planned 01:30 Leadership 15m 01:45 Mathematics 15m 02:00 Certifications 30m 02:30 Academic programs 30m 03:00 Technical study 60m 04:00 Algorithms 15m 04:15 English 30m 04:45 Mandarin 30m 05:15 Korean 30m 05:45 Greek 30m 06:15 Hindi 30m 06:45 Japanese 30m 07:15 Language review 30m

Leadership & business

Academic qualifications and continuing education. Completion status is shown for each program.

 FAAP - Fundação Armando Alvares Penteado Sep 2026 - Oct 2027 In progress	MBA in Leadership & People Management MBA studies in Leadership and People Management for technology-driven organizations. Covers people leadership, self-awareness and professional development, macro trends, emerging technologies, Agile methods, digital transformation, organizational design, entrepreneurship and Industry 4.0. Develops assertive and non-violent communication, conflict resolution, feedback, 1:1s, expectation alignment, inclusive leadership, diversity, employee well-being and sustainable high performance. Further topics include personal branding, employability, innovation, new ways of working, and the roles of Product Owners, Project Managers and technical leaders in cross-functional environments.
 Harvard Business Review Sep 2026 - Oct 2026 Completed 4 of 4 courses	Boost Your Leadership Impact Specialization Four applied leadership projects: building trust, inclusion and effective delegation; handling difficult conversations, resolving conflict and creating a feedback-rich environment; improving presentations and professional writing; and developing networks, persuasion and influence. Builds people-management, communication and relationship practices that support team growth and performance. Completed all four courses in October 2026, with the specialization certificate issued through Coursera. View specialization certificate >
 Universidade Paulista 2018 - 2021 Completed	Bachelor's degree, Business Administration and Management, General Bachelor’s Degree in Business Administration at UNIP (Universidade Paulista), providing a comprehensive foundation in business management, organizational strategy, finance, marketing, operations, human resources, economics, accounting, entrepreneurship, and project management. The program developed strong analytical, strategic, and leadership skills, with an emphasis on business decision-making, organizational management, process optimization, and the relationship between technology, business, and digital transformation. This academic background supports a multidisciplinary approach to technology and product leadership, combining business strategy and management principles with software engineering, technology, and innovation.

Cognition & human behavior

Academic qualifications and continuing education. Completion status is shown for each program.

 FAAP - Fundação Armando Alvares Penteado Sep 2026 - Oct 2027 In progress	Postgraduate Degree, Neuroscience & Behavior Postgraduate studies in Neuroscience focused on the biological, cognitive, affective, and behavioral mechanisms underlying human brain function. The program covers functional neuroanatomy, including the prefrontal cortex, limbic system, hypothalamus, hippocampus, amygdala, and cerebellum, as well as cognition, emotion, memory, decision-making, stress regulation, and neuroplasticity. It also explores neuroimaging and brain-mapping techniques such as MRI, PET, EEG, and connectomics; neuropsychology; neuroendocrinology and the HPA axis; neurological and psychiatric disorders; attachment, childhood adversity, and human development; psychotherapy and behavioral modification; and neuromodulation techniques such as Transcranial Magnetic Stimulation (TMS).
 University of Cambridge Sep 2026 - Feb 2027 In progress	The science of mind and decision making Specialization Cognitive psychology and neuropsychology, covering neuroimaging and empirical research methods; cognitive architecture and the interaction of genetic and experiential factors; psycholinguistics, language acquisition and shared attention; working memory, mental modularity and cross-modal sensory processing; and the neural foundations of executive function, attention, consciousness and free will.
 Duke University Sep 2026 - Mar 2027 In progress	Neuroscience Specialization Neurophysiology, clinical neuroanatomy and the functional organization of the central nervous system. Covers neuronal excitability, synaptic transmission and plasticity; proprioception, sensory networks and motor control; neurogenesis and brain development across the lifespan; association cortices, homeostasis, memory, emotion and perception. Examines conceptual connections between human cognition, biological neural networks and intelligent software systems.

AI engineering & machine learning

Academic qualifications and continuing education. Completion status is shown for each program.

Duke University

Oct 2026 - Apr 2027

In progress

Large Language Model Operations (LLMOps) Specialization

Large Language Model engineering, deployment, operation, lifecycle management, scaling and optimization in production. Covers generative AI, open-source and locally hosted LLMs, model serving and monitoring, LLMOps/MLOps, application architecture, and AI infrastructure across AWS, Azure, Databricks and local environments. Hands-on projects connect software engineering, cloud, DevOps and data engineering with reliable, scalable generative AI systems and practical deployment challenges.

Vanderbilt University

Sep 2026 - Mar 2027

In progress | 1 course completed

AI Agent Developer Specialization

Hands-on AI agent development using Python, OpenAI tools and prompt engineering. Covers agent architectures, tool use, memory, custom GPTs, and responsible, trustworthy AI. Applied projects build functional agents for workflow automation, document analysis and domain-specific insights, connecting agentic design with deployment in professional scenarios. Completed AI Agents and Agentic AI with Python & Generative AI in October 2026, with a course certificate; the broader specialization remains in progress.

[View completed course certificate >](#)

New York University

Sep 2026 - Feb 2027

In progress

Machine Learning and Reinforcement Learning in Finance Specialization

Machine learning and reinforcement learning applied to stock trading, asset management and banking. Assignments and projects combine a broad understanding of ML with selection of suitable methods, including unsupervised learning, for complex financial problems.

Data & algorithms

Academic qualifications and continuing education. Completion status is shown for each program.

 University of Washington Mar 2023 - Apr 2023 Completed	Machine Learning Specialization Practical machine learning case studies: house-price prediction, sentiment analysis of user reviews, document retrieval, product recommendations and image search. Hands-on application of ML methods across domains.
 University of Michigan Mar 2023 - Apr 2023 Completed	Large Language Models - LLMs Specialization Advanced LLM and generative AI coursework covering transformer architectures, prompt engineering, NLP, applications, responsible AI and model limitations. Focuses on designing, evaluating and integrating LLM-powered solutions into software engineering, product development, automation and digital transformation.
 University of Illinois Urbana-Champaign Sep 2026 - Jan 2027 In progress	Data Mining Specialization The Data Mining Specialization teaches data mining techniques for both structured data which conform to a clearly defined schema, and unstructured data which exist in the form of natural language text. Specific course topics include pattern discovery, clustering, text retrieval, text mining and analytics, and data visualization.

Mathematics & quantum computing

Academic qualifications and continuing education. Completion status is shown for each program.

Imperial College London

Oct 2026 - Dec 2026

In progress

Mathematics for Machine Learning Specialization

Mathematical foundations for machine learning, connecting linear algebra, multivariate calculus and principal component analysis with practical applications. Covers vectors and matrices, model fitting and optimization, and dimensionality reduction through PCA. Applied exercises use Python and NumPy to connect mathematical reasoning with implementation.

Universidade São Judas Tadeu

Oct 2026 - Oct 2027

In progress

Postgraduate Degree, Quantum Computing

Postgraduate studies in quantum computing, connecting quantum mechanics, information theory and mathematical foundations with practical quantum programming. Covers qubits, superposition, entanglement, interference, quantum gates and teleportation; Deutsch-Jozsa, Bernstein-Vazirani and Simon algorithms; the Quantum Fourier Transform; and Shor and Grover algorithms. Hands-on work uses Python and Qiskit, Q#, the Microsoft Quantum Development Kit, Azure Quantum, IBM Quantum, simulators and real quantum hardware. Explores quantum machine learning and AI, cryptography and the implications for RSA, NISQ systems, and applications in finance, optimization and materials science.

The Johns Hopkins University

Sep 2026 - Oct 2026

Completed

Algebra: Elementary to Advanced Specialization

Algebra and geometry foundations for precalculus and calculus, with quantitative reasoning, logical thinking and informed use of data. A sequence of applied problems and worked solutions develops practical mathematical fluency, with progressively challenging exercises throughout the modules. Covers equations and inequalities, functions and their applications, domains and ranges, exponential functions, polynomials and roots.

Foundations of engineering

Academic qualifications and continuing education. Completion status is shown for each program.

Stanford University

Sep 2026 - Dec 2026

In progress | 1 of 4 courses completed

Algorithms Specialization

Algorithm design, mathematical analysis and low-level implementation. Covers divide and conquer, sorting, searching, randomized algorithms, Big-O analysis, inversion counting, matrix multiplication, the master method and randomized quicksort. Graph topics include BFS, DFS, topological sort, Dijkstra, Bellman-Ford and Floyd-Warshall. Data structures include heaps, balanced search trees and hash tables. Also covers greedy algorithms, minimum spanning trees, Prim, Kruskal, Huffman codes, dynamic programming and NP-completeness.

PUC Minas

Oct 2022 - Dec 2023

Completed

Postgraduate Degree, Computer Software Engineering

Postgraduate Program in Software Engineering at PUC Minas, with a comprehensive focus on software architecture, backend and frontend development, mobile application architecture, APIs and Web Services, DevOps practices, data engineering, software design, requirements engineering, systematic software testing, and software quality. The program also covers Agile Project Management, software metrics and estimation, user experience design, implementation and continuous evolution of software, digital transformation, and strategic approaches to software design, providing a strong foundation for designing, developing, testing, and managing scalable, high-quality software solutions.

Software & cybersecurity

Academic qualifications and continuing education. Completion status is shown for each program.

Duke	Duke University Sep 2026 - Mar 2027 In progress	Object Oriented Programming in Java Specialization Six-month program developed by Duke University and UC San Diego covering Java and object-oriented programming, complex data structures, algorithmic optimization and design patterns. Data-driven projects emphasize computational efficiency, problem solving and the design of scalable, high-performance applications.
UNIVERSITY OF LONDON	University of London Sep 2026 - Jan 2027 In progress	Cyber Security - Technology and Governance Specialization Computer and network security from hardware to applications, including core components and system operation. Examines human factors in cybercrime, social engineering, criminals, victims and law enforcement. Covers practical security management and governance, incident response and the role of people in improving organizational security outcomes.
UNIVERSITY OF TORONTO	University of Toronto Sep 2026 - Mar 2027 In progress	iOS App Development with Swift Specialization This Specialization covers the iOS application development in the Swift programming language. It provides knowledge to use development tools such as XCode, design interfaces and interactions and evaluate their usability, and integrate camera, photo, and location information to enhance your app. In the final Capstone Project, the specialization will give the opportunity to apply your skills to create a fully-functioning photo editing app for iPhone, iPad, and Apple Watch. A Mac computer is required for success in this course.

Communication in English

Academic qualifications and continuing education. Completion status is shown for each program.

 EF English Live Ongoing In progress	English Course, English Ongoing English development with daily study throughout the week and a structured focus on one subject per day. Continuous practice in grammar, vocabulary, listening, speaking, reading and communication for professional and international environments.
 University of Pennsylvania Sep 2026 - Sep 2026 Completed	English for Science, Technology, Engineering, and Mathematics Specialization English for STEM: scientific and technical vocabulary, reading and listening comprehension, grammar, interpretation of data and scientific methods, and clear communication of complex technical concepts. Supports collaboration with global engineering teams, use of English-language documentation and research, and precise communication in professional and academic environments.
 Università degli Studi di Napoli Federico II Sep 2026 - Jan 2027 In progress	English Intermediate B1 Specialization Intermediate English development for professional, academic, business and everyday settings. Covers grammar, vocabulary, listening, speaking, writing, oral expression and interpersonal communication, applied to meetings, presentations, negotiations, interviews, professional correspondence and workplace interaction. Develops clear messages and confident collaboration in international and multicultural environments.

Academic communication

Academic qualifications and continuing education. Completion status is shown for each program.

UC Irvine

Sep 2026 - Oct 2026

In progress

Advanced Academic Speaking and Listening Specialization

Advanced academic and professional listening and speaking, including note-taking, discussions, public speaking, presentation delivery, critical thinking and verbal and non-verbal communication. Practical activities develop comprehension of complex lectures and conversations, clear organization of ideas and confident expression. Includes a final academic presentation project.

UC Irvine

Aug 2026 - Sep 2026

Completed

English Grammar Specialization

Grammar, sentence structure, vocabulary, comprehension and practical academic and professional communication, strengthening fluency, accuracy and confidence in English.

Global communication

Academic qualifications and continuing education. Completion status is shown for each program.

 UNIVERSITAT POLITÈCNICA DE VALÈNCIA	Universitat Politècnica de València (UPV) Sep 2026 - Oct 2026 In progress	Español: A1 Specialization Spanish study aligned with CEFR A1.1, covering vocabulary, grammar, pronunciation and everyday communication. Topics include greetings, introductions, personal information, descriptions, locations and directions, present-tense and reflexive verbs, routines, dates, time, family and social interaction. Introduces a Chilean cultural context.
	Shanghai Jiao Tong University Sep 2026 - Jun 2027 In progress	Mandarin Chinese Specialization Four-course program in Mandarin vocabulary, grammar, pronunciation, listening, practical communication and Chinese culture. Covers approximately 1,000 words, 75 language points and 30 everyday situations, with preparation strategies for HSK Levels 1-2. A capstone applies Mandarin in simulated real-world scenarios.

A global perspective.

 Portuguese	 English	 Spanish
 Mandarin Chinese	 French	 German
 Italian	 Dutch	 Greek
 Hindi	 Japanese	 Korean

6h

Daily study, deliberately organized.

A six-hour daily commitment. More than seven years of consistent learning across engineering, leadership, mathematics and communication. Explore the weekly routine.

05 / CERTIFICATIONS

Professional credentials.

Cloud, AI, product ownership, Scrum and event streaming.
