

Wesley Vieira

Software Engineering Leader Software & Agentic AI

Osasco / São Paulo, Brazil

+55 11 98553-6310 | wesleysv11@gmail.com

Software engineering leader combining hands-on architecture, people development and cross-team delivery in regulated financial services. Leads 2 squads and 15+ engineers across 20+ systems/services. Connects Java/JVM, AWS, distributed systems, data, AI, product and security with reliable production delivery. Career initiatives include R\$800M+ in reported revenue and fraud-loss mitigation outcomes.

CAREER IMPACT

R\$350M

Fraud-loss mitigation

R\$300M

ML-driven fraud savings

R\$150M+

New credit revenue

CURRENT LEADERSHIP

Lead Software Engineer

Itaú Unibanco | Jun 2026 - Present

Fraud Prevention | São Paulo, Brazil

- Own technical direction for 2 squads and 15+ engineers across 20+ fraud engines, systems and services supporting Pix, debit and credit cards, vehicle and mortgage credit, and crypto journeys.
- Drive hands-on modernization of a ~1,900-file legacy landscape into maintainable AWS services and repositories, using Java, Spring Boot, Kotlin, Python, REST APIs, Kafka, Redis and IBM MQ.
- Define architecture and engineering standards across distributed systems, Terraform, Kubernetes, Docker, CI/CD, DevSecOps, automated testing, observability and SRE; guide design reviews and production reliability.
- Shape technical roadmaps across Engineering, Product, Architecture, Data, Security, Risk and Business; build AI agents and engineering automation with RAG, MCP, LangGraph, Claude Code, Devin and GitHub Copilot.

Experience & progression.

Wesley Vieira / Software Engineering Leader

Lead Software Engineer

Bradesco | Feb 2025 - May 2026

Credit Platforms & Digital Channels | Osasco, Brazil

- Led architecture and launch of an investment-backed personal-credit platform associated with R\$150M+ in new revenue, directing 3 cross-functional squads and integrating Java microservices, Kafka, HBase, Python and FICO eligibility rules.
- Led secured-lending initiatives covering CCB issuance, collateral locks, credit and investment rules, and alphanumeric CNPJ modernization across hybrid cloud and mainframe systems.
- Designed and evolved enterprise credit services with Saga and circuit-breaker patterns; modernized COBOL, JCL and DB2 integrations alongside Java services and Azure environments.
- Led backend, BFF and mobile delivery across TypeScript, Kotlin, Swift, Java, REST APIs and Redis; strengthened CI/CD, DevSecOps, observability and production stability, and contributed to the Bitbucket-to-GitHub migration.
- Mentored junior through senior engineers through design reviews, solution assessments, pull-request reviews, feedback and career development; aligned Product, Security, Architecture, Infrastructure, Operations and Business.

Senior Java Software Engineer

Itaú Unibanco | Oct 2024 - Jan 2025

Personal Credit | São Paulo, Brazil

- Engineered backend services and integrations for vehicle, consortium and mortgage credit using Java, Spring Boot, Spring MVC, Spring Data, Hibernate/JPA, JDBC and SQL.
- Connected FICO Credit Engine business rules with Python/PySpark analysis and systems of record / sources of truth (SoR/SoT); translated credit requirements into secure, traceable APIs and maintainable workflows.
- Supported architecture evolution, production incidents, automated testing, CI/CD and observability with a focus on reliability, performance, authentication and authorization.

Senior Technical Product Manager | Itaú Unibanco | Nov 2023 - Oct 2024

Product Manager | Itaú Unibanco | May 2022 - Nov 2023

Fraud Prevention Junior Analyst | Itaú Unibanco | Dec 2020 - May 2022

Corporate Security Intern | Itaú Unibanco | Sep 2019 - Nov 2020

Investments Intern | BMP Money Plus | Feb 2019 - Aug 2019

Engineering depth.

Wesley Vieira / Software Engineering Leader

Product, leadership & communication

Technical strategy, architecture roadmaps, design/code reviews, mentoring, discovery, prioritization, product metrics, Scrum, Kanban, ITIL, data storytelling, GitHub Pages and Docusaurus; Excel, Power BI, Access, Office, macros/VBA and Adobe Premiere Pro.

Architecture & integration

Microservices, distributed systems, event-driven architecture, BFF, Saga, Circuit Breaker, GoF design patterns, Lambda/Kappa architectures, SoR/SoT integration, FICO Credit Engine, mainframe modernization and hybrid cloud.

Languages & programming

Java, Kotlin, Python, TypeScript, JavaScript, SQL; Go, Swift, C#, .NET, COBOL, JCL. Additional profile breadth: C, PHP, VBA, LINQ, object-oriented and functional programming, Streams, lambdas and reflection.

Backend & APIs

Spring Boot, Spring MVC, Spring Data, Spring Security, Hibernate, JPA, JDBC, DAO, Lombok, Java Servlet, Maven, Node.js, Express.js, Django, Django REST Framework; REST, OpenAPI/Swagger, GraphQL and gRPC.

Cloud infrastructure & delivery

AWS, Microsoft Azure, Terraform, Docker, Kubernetes, Linux, virtualization and CI/CD. Further applied study: Google Cloud, GKE, Ansible, Helm, Istio, ArgoCD, Azure Red Hat OpenShift and Amazon Lightsail.

DevSecOps, SRE & quality

Git, GitHub, GitFlow, Bitbucket, Jenkins, SonarQube, Fortify, Veracode, OWASP, JWT, LDAP, authentication and authorization; Datadog, Prometheus, Grafana, Splunk, ELK, SLOs, incident management, JUnit, Cucumber BDD, TDD, Jasmine and Karma.

AWS compute, network & security

EC2, ECS/Fargate, EKS, Lambda, Elastic Beanstalk, S3, VPC, EBS, ELB, Route 53, CloudFront, IAM, WAF, Shield, Cognito, Macie, AWS CLI, CloudFormation, CodeBuild, CodePipeline and CloudWatch.

AWS data & orchestration

RDS, Aurora, DynamoDB/DAX, Redshift, Glue, Athena, EMR, Kinesis, MSK, SageMaker, SQS, SNS, Step Functions and EventBridge.

Data platforms & messaging

PostgreSQL, MySQL, SQL Server, DB2, HBase, Redis, Kafka, IBM MQ, Hadoop, ZooKeeper, PySpark, Pandas and SAS; MongoDB, NoSQL, SQLite, Spark, Airflow, Databricks, Data Mesh, ETL and data warehousing.

AI, machine learning & agents

Generative AI, LLMs, AI agents, RAG, MCP, LangGraph, Claude Code, Devin, GitHub Copilot, TensorFlow, Keras, scikit-learn, NLP, MLOps, Jupyter, Matplotlib and Seaborn; PyTorch, neural networks and model evaluation.

Frontend, mobile & design

React, Next.js, Vue, Nuxt, Angular, Angular Material, RxJS, Electron, Ember, jQuery, Bootstrap, HTML/HTML5, CSS, AJAX, Web Components, Webpack and Gulp; Flutter; Kotlin/Android, Swift/iOS, Figma and Draw.io.

Evidence & continuous development.

Wesley Vieira / Software Engineering Leader

SELECTED QUALIFICATIONS

PUC Minas | Postgraduate Degree, Computer Software Engineering

Oct 2022 - Dec 2023 | Completed

Universidade Paulista | Bachelor's degree, Business Administration and Management, General

2018 - 2021 | Completed

FAAP - Fundação Armando Alvares Penteado | MBA in Leadership & People Management

Sep 2026 - Oct 2027 | In progress

Harvard Business School | Boost Your Leadership Impact Specialization

Sep 2026 - Oct 2026 | In progress | 3 of 4 courses completed

Duke University | Large Language Model Operations (LLMOps) Specialization

Oct 2026 - Apr 2027 | In progress

Vanderbilt University | AI Agent Developer Specialization

Sep 2026 - Mar 2027 | In progress

PROFESSIONAL CREDENTIALS

AWS AI Practitioner, Solutions Architect - Associate, Developer - Associate and Cloud Practitioner. Microsoft Azure Fundamentals (AZ-900). PSPO II. SFC. SFPC. Confluent Fundamentals Accreditation.

RECOGNITION & CONTRIBUTION

Walther Moreira Salles Award, Itaú Unibanco, December 2023. WhatsApp fraud-alert initiative associated with R\$350M in reported fraud-loss mitigation. Volunteer security speaker at Expo Longevidade 2022.

Author of 13 technical articles. 446 course records. Latest study: Stanford algorithms, completed Johns Hopkins Algebra, Imperial mathematics for ML and postgraduate Quantum Computing. A 6h daily study commitment, seven days a week. More than seven years of consistent learning.

A discipline of daily learning.

Wesley Vieira / Software Engineering Leader

6h

DAILY STUDY COMMITMENT

Seven days a week.

More than seven years of consistent learning.

I turn curiosity into a structured daily practice. My calendar reserves focused time for engineering, leadership, mathematics, academic programs, certifications and languages, with review built into the week.

A TYPICAL MONDAY / SÃO PAULO TIME

01:30 - 02:00	Leadership and mathematics
02:00 - 03:00	Certifications and academic programs
03:00 - 04:45	Technical study and algorithms
04:45 - 07:45	English, Spanish, Dutch, French, German and Italian
07:45 - 08:15	Language review and consolidation

THE WEEKLY RHYTHM

English every day. Spanish, Dutch, French, German and Italian on Monday, Wednesday, Friday and Sunday. Mandarin, Hindi, Japanese, Korean and Greek on Tuesday, Thursday and Saturday. Leadership, foundations, technical study, academic work and certification study have recurring places throughout the week.

Current recurring calendar from 12 Oct 2026: 6h15 to 7h of planned study per day. The complete portfolio includes every daily time block.
